

# **WATER**

## **MONITORING PROGRAM**

***The MMF's Métis Community-Based Climate Monitoring Program (MCBCM) is looking for Red River Métis Citizen Scientists to participate in water quality monitoring across our National Homeland.***

**Monitoring activities include taking monthly water quality samples and determining water clarity in our lakes, rivers, or streams.**

**This information supports our overarching goal of protecting the health and traditional uses of our lands, waters, and natural resources, for generations to come.**

***ALL TRAINING, EQUIPMENT AND HONORARIUM IS PROVIDED FOR PARTICIPATION***

For more information and to get involved, please contact the Métis Climate Monitoring Coordinator, Phoenix Combe, at ***phoenix.combe@mmf.mb.ca***.
