LONG-TERM MONITORING

PHYSICAL ADDRESS OF GARDEN BOX SITE:

This project is intended to increase food security by providing citizens with healthy vegetables grown in a sustainable manner. We are also looking to capture data to be able to calculate the amount of carbon being sequestered by the plants being grown in the garden box. Any picture you may be able to share would be very helpful!

I am able provide photos and harvest records of the garden boxes each year.

I agree if I am not utilizing the garden box, I will return it to the Manitoba Métis Federation.
